# Contents

<b>Preface: An Introduction to Scientific Research Methods in Geography</b>	<b>ix</b>
<b>Acknowledgments</b>	<b>xv</b>
<b>1. Introduction: A Scientific Approach to Geography</b>	<b>1</b>
Learning Objectives	1
Overview of the Logic and Philosophy of Science	3
Characteristic Metaphysical Beliefs of Scientists	5
Nonscientific Ways of Knowing	7
Goals of Science	8
History and Philosophical Systems of the Discipline of Geography: Natural Science, Social Science, and Humanities	10
Review Questions	13
Key Terms	13
Bibliography	16
<b>2. Fundamental Research Concepts</b>	<b>17</b>
Learning Objectives	17
Idea Concepts	17
Empirical Concepts	21
The Concept of Scale in Geography	27
Generating Research Ideas	28
Review Questions	30
Key Terms	30
Bibliography	33
<b>3. Data Collection in Geography: Overview</b>	<b>35</b>
Learning Objectives	35
Primary and Secondary Data Sources	36
Types of Data Collection in Geography	36
An Introduction to Quantitative and Qualitative Methods	38
Review Questions	41

Key Terms	42
Bibliography	43
<b>4. Physical Measurements</b>	<b>45</b>
Learning Objectives	45
Physical Measurements in Physical Geography	46
Geodetic Measurement	47
Physical Measurements of Earth Systems	49
Physical Measurements in Human Geography	56
Review Questions	58
Key Terms	58
Bibliography	63
<b>5. Behavioral Observations and Archives</b>	<b>65</b>
Learning Objectives	65
Behavioral Observations	66
Archives	69
Coding Open-Ended Records	70
Example Coding	72
Coding Reliability and Validity	75
Review Questions	78
Key Terms	79
Bibliography	80
<b>6. Explicit Reports: Surveys, Interviews, and Tests</b>	<b>81</b>
Learning Objectives	81
Format of Explicit Reports	84
Rating Scales	87
The Administration of Explicit Reports	89
Using the Internet to Collect Explicit Reports	91
Designing and Generating Explicit Instruments	93
The Census: An Important Secondary	
Source of Explicit Report Data for Geographers	95
What Do U.S. Census Data Look Like	
and How Can You Obtain Some?	98
Limitations of Explicit Reports	101
Review Questions	104
Key Terms	105
Bibliography	108
<b>7. Experimental and Nonexperimental Research Designs</b>	<b>111</b>
Learning Objectives	111
Empirical Control in Research	112
Laboratory vs. Field (Naturalistic) Settings	117
Basic Research Designs	118
Specific Research Designs	119
Developmental Designs (Change over Time)	122
Single-Case and Multiple-Case Designs	124

Computational Modeling	125
Steps of Computational Modeling	129
Review Questions	132
Key Terms	132
Bibliography	136
<b>8. Sampling</b>	<b>137</b>
Learning Objectives	137
Sampling Frames and Sampling Designs	139
Implications of Sampling Frames and Designs	144
Nonparticipation and Volunteer Biases	146
Spatial Sampling from Continuous Fields	147
Sample Size	151
Review Questions	153
Key Terms	153
Bibliography	156
<b>9. Statistical Data Analysis</b>	<b>157</b>
Learning Objectives	157
Statistical Description	158
Statistical Inference	164
Estimation and Hypothesis Testing	168
Data in Space and Place: Introduction to Geospatial Analysis	173
Review Questions	178
Key Terms	179
Bibliography	184
<b>10. Data Display: Tables, Graphs, Maps, Visualizations</b>	<b>185</b>
Learning Objectives	185
Guidelines for Designing Displays	188
Tables	190
Graphs	192
Maps	199
New Trends in Scientific Visualization	203
Review Questions	206
Key Terms	207
Bibliography	211
<b>11. Reliability and Validity</b>	<b>213</b>
Learning Objectives	213
Reliability	213
Validity	216
Internal Validity	217
External Validity	219
Construct Validity	220
Statistical Conclusion Validity	222
Researcher-Case Artifacts	224
Review Questions	226

Key Terms	227
Bibliography	229
<b>12. Geographic Information Techniques in Research</b>	<b>231</b>
Learning Objectives	231
Geographic Information	232
Data Models and Data Structures	236
Remotely Sensed Geographic Information	239
Geographic Information Systems	242
Information Storage	243
Data Query and Display	244
Data Manipulation and Analysis	246
Review Questions	250
Key Terms	251
Bibliography	254
<b>13. Scientific Communication in Geography</b>	<b>257</b>
Learning Objectives	257
Peer Review System for Academic Publishing	263
The Basic Structure of a Journal Manuscript:	
The One-Study Empirical Article	267
Two Aspects of Style in Scientific Writing	271
Using the Library for Scientific Research	273
Review Questions	275
Key Terms	276
Bibliography	278
<b>14. Ethics in Scientific Research</b>	<b>279</b>
Learning Objectives	279
Treating the Natural and Cultural World Ethically	282
Treating Human Research Subjects Ethically	284
Institutional Human Subjects Review	287
A Case Study for Geographic Research:	
The Ethics of Tracking People	288
Review Questions	290
Key Terms	290
Bibliography	292
<b>Index</b>	<b>293</b>
<b>About the Authors</b>	<b>303</b>
